

VA Boston Healthcare System

PGY-1 Residency Program

VA Boston Healthcare System (VABHS) exists to serve the veteran through the delivery of timely quality care by staff who demonstrate outstanding customer service, the advancement of health care through research, and the education of tomorrow's health care providers.

The VABHS consists of three campuses: Jamaica Plain, West Roxbury and Brockton, where pharmacists are responsible for providing pharmaceutical care in a variety of Ambulatory Care and Inpatient settings.

Clinical Pharmacy Specialists (CPS) are actively involved in the management of patients with various disease states and work closely with other health care professionals. CPS at the VABHS have prescriptive privileges under the supervision of an attending physician.

VABHS offers a PGY-1 residency program, with seven positions, that is flexible enough to meet the interests of its individual residents. Residents can choose to spend the majority of their time in either Ambulatory or Acute Care experiences or spend equal time in each.

All PGY-1 residents are required to have at least one 12-week block focusing on ambulatory care. During that block the residents will spend a minimum of two days in primary care clinic, one day in anticoagulation clinic, and the remaining time devoted to staffing, educational activities, and electives. The residents are also required to have a minimum of three 4-week blocks, each focusing on a single experience. The three required 4-week blocks are inpatient general medicine, critical care, and management. For the remaining six-months of the program the resident is able to chose between 12- or 4-week blocks.

A large emphasis is placed on resident research projects. Each resident is paired with a project preceptor with research experience to mentor them through the process. In addition, an experienced Research & Development Committee and statistician are available for guidance. Residents are also responsible for obtaining IRB approval and applying for grants to aid in project funding. Research projects are presented at ASHP Midyear Clinical Meeting and Eastern States Conference for Residents and Preceptors.

Residents are exposed to a wide variety of additional experiences and opportunities. Some of these include participation in the VABHS P&T and Quality Management committees. Opportunities to design and deliver presentations for ACPE Continuing Education credit are available. VABHS has strong relationships that provide teaching opportunities with the two pharmacy schools in Boston: Northeastern University and Massachusetts College of Pharmacy.

Core Required Experiences

Primary Care Clinic
Anticoagulation Clinic
Inpatient General Medicine
Critical Care
Management

Elective Experiences

Cardiac Health
Endocrinology
Epoetin Management
Infectious Disease
Inpatient Anticoagulation
Investigational Drugs
Mental Health
Oncology
Advanced Core Experiences

Additional Activities

Medication Use and Evaluation
P&T Committee
Continuing Education Presentations
Practice Management
Total Quality Management
Fiscal and Materials Management
Human Resources
Teaching Opportunities

Resident Project and Presentation

ASHP Midyear Clinical Meeting
Eastern States Conference
